The UniFirst logo, featuring the word 'UniFirst' in a bold, white, sans-serif font.

UniFirst Earns 2021 OH&S Award for Armorex FR Enhanced Visibility Safety Coveralls

UniFirst Corporation, a North American leader in providing customized work uniform programs, corporate attire, and facility service products for businesses, was recently awarded Occupational Health & Safety's 2021 Platinum Industrial Hygiene Award in the Protective Clothing category for their Armorex FR® (Flame Resistant) Enhanced Visibility Coveralls.

The Occupational Health & Safety (OH&S) Industrial Hygiene Awards honor outstanding product development achievements of health and safety manufacturers. These renowned products or services are considered particularly noteworthy not only for their ability to keep customers safe and protected, but also for their ability to improve industrial hygiene. An independent panel of expert judges carefully reviewed and scored each entry, with the judges' combined scores determining the winners of each category.

"UniFirst is honored to be recognized for our workwear safety line of Armorex FR Enhanced Visibility Coveralls," said Adam Soreff, director of marketing and communications for UniFirst. "As part of our commitment to our customers and uniform wearers, we're continually striving to offer garments that are comfortable, functional, and help keep workers safe on the job. These uniform coveralls offer all these attributes and have emerged as one of our more popular offerings."

Armorex FR Enhanced Visibility Coveralls from UniFirst provide workers with top-quality, two-way safety protection in both hazardous (flame risk) and low-light work environments. These innovative coveralls protect from both flash fire and arc flash with an Arc Thermal Performance Value (ATPV) of 8.7 – a notch ahead of some standard FR garments that are sold in retail stores. They also provide 360-degree, enhanced visibility with 2" silver retroreflective 3M taping around the sleeves and legs, increasing worker visibility on low- and no-light worksites.

In addition to their protective qualities, Armorex FR Enhanced Visibility Coveralls employ a number of features for both

The New Standard for Linemen

At Tallman Equipment, our priority is to set the standard in the electric transmission and distribution industry with an all-inclusive approach to serving our customers. Our vision to deliver a trio of quality, convenience, and reliability is driven by listening and adapting to the needs of our customers. As the industry changes, so does Tallman. As a result, Tallman Equipment has become a unique company within our industry offering a full range of professional services including tool sales, product distribution, rentals, and repair. Tallman is already a trusted name in stringing blocks, cable assemblies, fiberglass, and rope products – and we are excited to announce the addition of our new Rubber Goods Testing Lab.

Our Services Include:

Groundset & Jumperset Manufacturing, Repair & Refurbishing

Transformer Sling Manufacturing & Rope Repair

Battery Power Tool & Equipment Repair

Fiberglass Tool Testing, Repair & Refinishing

Tool & Equipment Rental

Rubber Goods Testing & Refurbishment

Trust **TALLMAN**

comfort and convenience, as well as safety. Manufactured with patented UltraSoft flame resistant fabric for enhanced wear life and protective performance, these coveralls come complete with a deep “action back” that helps to increase the wearer’s range of motion, and are equipped with pass-throughs on each side for easy access to inner clothing.

When included with UniFirst rental services, these safety coveralls are cleaned and maintained on a regular schedule in accordance with the company’s highly valued hygienic laundering standards – providing measures of safety, security, and peace of mind to anyone who wears or provides them.

Due to an ever-increasing need for top-quality industrial hygiene information and a lack of in-person opportunities, OH&S premiered its Industrial Hygiene Virtual Summit last year. To kick off 2021, OH&S launched the Industrial Hygiene Awards, providing an additional opportunity to spread the news about industrial hygiene.

“This contest is just one of the many ways we have highlighted outstanding industrial hygiene products,” said OH&S Editor Sydney Shepard. “It is our hope in these continuously trying times that the Industrial Hygiene Awards will bring more information, awareness and safety to employers and employees.”

About UniFirst:

Headquartered in Wilmington, Mass., UniFirst Corporation (NYSE: UNF) is a North American leader in the supply and servicing of uniform and workwear programs, as well as the delivery of facility service programs. Together with its subsidiaries, the company also provides first aid and safety products, and manages specialized garment programs for the cleanroom and nuclear industries. UniFirst manufactures its own branded workwear, protective clothing, and floorcare products; and with 260 service locations, over 300,000 customer locations, and 14,000 employee Team Partners, the company outfits more than 2 million workers each business day. Terex Utilities introduces Strongest Digger Derrick in the Transmission Market

Terex Utilities introduces a new generation of the General 65 digger derrick for utility transmission applications during the virtual Electric Utility Fleet Managers Conference (EUFMC) in June. “The General 65 MAX boasts greater capacities through all boom angles, but especially in the work zone,” said Joe Caywood, Director of Marketing. “Whether the transmission crew needs low boom angles for digging holes and pulling a full auger flight of dirt or unloading pad mount transformers at high boom angles, the General 65 MAX has superior lifting capacity in all positions,” he said.

At a 10-ft radius and fully retracted, it can lift 22,620 lbs. With the optional X-Boost, the General 65 MAX features 25,000 lbs. capacity at high boom angles, which is 26% more power than its predecessor. X-Boost adjusts hydraulic pressure to increase load handling capability and enables strong performance for lifting at high boom angles.

“The General 65 MAX has the most competitive capacity ratings in the market,” said Caywood.

In addition, crews will experience the highest work zone capacity when digging holes. “At zero degrees with the boom fully extended—which is the most challenging position to work from—the General 65 Max can lift almost a ton, representing over 80% increase,” said Caywood. “It is important that a digger derrick can dig a hole, lift a full flight of dirt on the auger and set the pole from one truck setup to keep crews productive. Out and down as well as radial outrigger configurations provide the best load chart for lifting capacities.

The General 65 MAX leverages many Terex pioneered digger derrick design features such as trapezoidal dual hydraulic cylinders, which work to stabilize the boom during digging and rotating; a retractable rectangular boom; and

filament wound fiberglass third boom section.

Other common features will make life easier for technicians and operators. "Terex Commander and General series of digger derricks have standardized controls, which supports operator performance by delivering the same look and feel regardless of which Terex digger derrick the operator is used to," said Caywood. Radio controls and other control station options are available so controls can be customized. Technicians will also experience ease of maintenance working on a simple, full-pressure hydraulic system and overall maintenance access to features such as the collector block and extension cylinders.

The General 65 MAX can be equipped with a variety of tools and accessories to increase productivity. Options include several styles of transferrable pole guide arms, full lineup of Terex augers to match digging conditions and

material handling jibs.

To learn more about the General 65 MAX, visit <https://www.terex.com/utilities/en/product/commander-general-series/General-65>.

EUFMC attendees are also learning more about several new products introduced this year and heard a video message from Terex Utilities team leaders regarding expanded manufacturing capabilities and new service centers coming in 2021. Visit : <https://vimeo.com/551529446/8fd581b787> to watch the video.

GREAVES

The LifterSM

We've Got Your Back

Safety professionals continuously strive to find new and innovative ways in support of a safe, productive work environment. Organizations engaged in the maintenance of underground infrastructure networks are presented with a daily worker safety challenge.

Each day, hundreds if not thousands of heavy manhole covers are removed manually in the process of accessing networks. This task results in heavy lifting exposing workers to the workplace hazard of back, shoulder, hand, and foot injuries. These injuries can result in high direct and indirect costs to workers and employers. These injury occurrences are a workplace reality.

There is now an innovative solution that automates the removal process. Workers can now remove covers with the smile push of a button while at the same time supporting efficient job performance. The Lifter and The Lifter PLUS are revolutionizing how organizations are protecting their workers from injury. These tools also support gender and aging worker demographics to keep them productive and safe.

A broad range of organizations representing municipalities, electric utilities, telecom, universities, airports, military bases, large government and industrial complexes and others are turning to an innovative safety tool to directly address this safety hazard.

ToughBuilt Waterproof Knee Pads TB-KP-102

The ToughBuilt Waterproof Knee Pads are THE most versatile solution for wet and dirty jobs, from concrete to gardening. The pliable outer shell protects the knee on rough terrain while preventing scratches on the most delicate surfaces. The high-density foam provides all-day comfort. The flexible accordion construction keeps out debris, and maintains your comfort while walking. The elastic band, wrapped around the upper calf, avoids painful strapping at the back of the knee. The knee pads can be easily cleansed off with water after every job.

Toughbuilt provides the ultimate in stability, comfort, and functionality. What makes these waterproof knee pads outstanding is ToughBuilt's premium manufacturing and their lightweight solution, made to the highest quality standards, ensuring durability to withstand harsh work environments, and saving you from constantly buying replacements. The rugged materials make the reliable knee pad withstand the most rigorous working conditions. The light weight design makes sure that your range of motion is not compromised.

JLG's Parent Company, Oshkosh Corporation, Earns Top Honors

Recognized for ethical business practices, sustainability initiatives and technology advancements

JLG Industries, Inc., an Oshkosh Corporation company and leading global manufacturer of mobile elevating work platforms (MEWPs) and telehandlers, is pleased to announce that parent company Oshkosh Corporation has recently received several prestigious industry awards for the Company's ongoing ethical business practices, sustainability efforts and use of emerging and advancing digital technologies.

Committed to creating a more sustainable future, Oshkosh was named one of Barron's "100 Most Sustainable Companies" and has been included in the S&P Global Sustainability Yearbook 2021, both for the fourth consecutive year. Steadfast in sustainability initiatives, Oshkosh Corporation has pledged to reduce greenhouse gas emissions and energy consumption and continues to make investments in technology including the development of battery-powered products.

The Company was also a recipient of the IDG CIO 100 Award for information technology excellence. Oshkosh Corporation's Digital Technology team is powered by team members around the world, all focused on solving business challenges. This is the third consecutive year that Oshkosh Corporation has received this award. The Company also received the IDG FutureEdge 50 Award for its innovative use of emerging technology. This is the first time that Oshkosh Corporation has received this global award.

MADE FOR **MORE** TO KEEP PACE WITH **YOU**

You begin each day before dawn with a drive and determination to do **more** than the day before. When you move at this pace, you know to do more you need equipment that is made for more. That's why our utility line and land clearing equipment, like our **Forestry Mulchers and Aerial Trimmers**, is built from the ground up to meet your needs, delivering:

More Power and Production
Lower Operating Costs
Greater Reliability
Better Safety Features
Superior Operator Comfort and Control

If you're ready to operate equipment that's made to keep pace with you, then we invite you to go to **morbarkdealers.com** to find your local authorized Morbark or Rayco dealer. Your dealer will work with you to assess your needs now and in the future, as well as offer equipment recommendations, financing options, wear parts and service if you should ever need it.

Equipment is available for **SALE** or **RENT**.

RAYCO
BY MORBARK

In addition to these awards, Oshkosh Corporation has also been named one of the World's Most Ethical Companies by Ethisphere, one of FORTUNE's World's Most Admired Companies, one of America's Most Responsible Companies by Newsweek, as well as one of America's Top 250 Best-Managed Companies by the Wall Street Journal.

"Earning top honors from so many different organizations is testimony to the collective drive towards excellence by all Oshkosh Corporation global team members who remain focused on sustainable operations, empowering others and developing innovative solutions that drive the business forward," said Frank Nerrenhausen, Oshkosh Corporation executive vice president and president of the company's Access Segment, which includes two industry leading brands: JLG® aerial lifts and material handling equipment including boom lifts, scissor lifts, low-level access lifts, vertical access lifts, stock and order picker lifts, towable lifts and telehandlers, and Jerr-Dan® towing and recovery equipment including carriers, wreckers and rotators.

To keep up-to-date on Oshkosh Corporation news, please visit: <https://investors.oshkoshcorp.com/news>.

For more information about Jerr-Dan, visit www.jerrdan.com. For more information about JLG, visit www.jlg.com.

About JLG Industries, Inc.

JLG Industries, Inc. is a world-leading designer, manufacturer, and marketer of access equipment. The Company's diverse product portfolio includes leading brands such as JLG® aerial work platforms; JLG and SkyTrak® telehandlers; and an array of complementary accessories that increase the versatility and efficiency of these products. JLG is an Oshkosh Corporation company [NYSE: OSK]. For more information about JLG Industries, Inc., visit www.jlg.com, or find us on Twitter, Facebook, LinkedIn, Instagram and YouTube.

About Oshkosh Corporation

At Oshkosh (NYSE: OSK), we make innovative, mission-critical equipment to help everyday heroes advance communities around the world. Headquartered in Wisconsin, Oshkosh Corporation employs nearly 15,000 team members worldwide, all united behind a common cause: to make a difference in people's lives. Oshkosh products can be found in more than 150 countries under the brands of JLG®, Pierce®, Oshkosh® Defense, McNeilus®, IMT®, Jerr-Dan®, Frontline™, Oshkosh® Airport Products, London™ and Pratt Miller. Work Safe

DICA Launches eCommerce Site for Convenient Purchase of Standard Products

DICA announces customers can now purchase many of its products through an online eCommerce portal. "As our product lines have expanded to include a wide variety of engineered equipment setup aids, our new eCommerce site improves convenience for customers," said Kris Koberg, CEO of DICA.

Featured on the site are SafetyTech® Outrigger Pads, ProStack® Cribbing, LiftGuard Sling Protectors, AlturnaMATS® and VersaMATS Ground Protection Mats, Checkers Wheel Chocks, and TrainSmart® Pole Barriers.

DICA still encourages customers to consult with their Fitting Consultants to help ensure accurate outrigger pad and crane pad selection. "The right combination of shear strength, compression strength, and rigidity are required to effectively support and distribute the imposed loads and pressures," says Kris Koberg, CEO. "Our fitting process begins with an accurate understanding of the equipment loads and pressures and our customer's needs and objectives. With this information, DICA Fitting Consultants can recommend the appropriate outrigger pad and crane pad options to meet and exceed customer objectives."

Sizing is less involved for the products featured on the eCommerce site and online ordering offers customers 24/7 convenience. In addition, shipping is free for all but the ground protection mats. Visit store.dicausa.com to order these products.

- SafetyTech Medium Duty Outrigger Pads are designed for many trailers, smaller aerial lifts, and digger derrick applications.
- ProStack Slot Lock and Pyramid Lock Cribbing Blocks, interlock to provide stacking height where equipment must be setup in unlevel areas.
- LiftGuard Magnetic Sling Protectors prevent damage to slings caused by contact with abrasive edges, corners or protrusions from loads being lifted.
- AlturnaMATS and VersaMats Ground Protection Mats are used to prevent damage to yards, businesses and land-

THE FUTURE IS BRIGHT.

WITH A NEW MANUFACTURING FACILITY, ADDITIONAL
SERVICE CENTERS AND EXPANDED SERVICE AND PARTS TEAM

We're more prepared than ever to deliver.

For more than 75 years, Terex Utilities has been a pioneer of insulated and digging equipment for the electric utility industry. Along the way, we've established a pattern of innovation and continuous improvement in order to deliver solutions so linemen can be productive and keep the lights on for their customers. This is an exciting time in Terex Utilities' history – with strategic investments being made in our manufacturing capabilities, our service footprint, new products, team members and overall customer experience. The future is looking bright, and we're excited to continue delivering equipment and service solutions to the electric utility industry – now better than ever.

Give us a call at 844-TEREX-4U for your equipment, service and parts needs.
