INNOVATIONS

Faster Safer Workspace

iTOOLco.

ALL JACK™

Increase productivity and decrease fatigue using iTOOLco's All Jack™. Install pipe, lights, cabinets, drywall, temporary dust barriers and much more with this innovative jack designed to lift and support the weight of your workpiece while you anchor it into position.

High ceilings and ladder work are not a problem for this dynamic tool. Reach from 58" to a staggering height of 13'6". The industrial gas shock ensures a snug, stable support that stays in place while you complete the installation. Once your workpiece is secured into place, simply remove the All Jack™ by releasing the shock. More powerful than a typical support pole, the All Jack's gas shock can handle your most challenging jobs.

SCAN QR

CORDLESS CANNON 3K™

Speed, Versatility, and performance are all yours with iTOOLco's Cordless Cannon 3K™. This portable 3,000 lb. puller is intuitively designed to handle all of your day-to-day wire pulls.

The built-in capstan switch automatically turns the puller on and off. Simply tug on the rope to start the pull and slack off the rope to shut it down.

Delivers dynamic performance in remote locations or areas where power is not yet available.

The high-capacity rechargeable battery is long-lasting and delivers maximum power.

The Cannon 3K™ will even chew through a medium size run of 4 - 350 in 3" conduit with 4 - 90s 220' long in record time and still have half the battery life for your next pull.

Skyward Announces Preorders for Parrot ANAFI Ai 4G LTE Connected Drone Solution

Verizon 4G LTE connectivity powers mid-flight data transfer to create 2D maps and direct data transfer to build 3D models within Skyward

Today, Skyward, A Verizon company, announced preorder availability for Parrot ANAFI Ai, the first and only off-the-shelf drone powered by Verizon's 4G LTE network, as part of the Skyward Connected Drone Solution. In particular, Skyward enables mid-flight data transfer to begin processing of imagery into 2D orthomosaic maps while Parrot ANAFI Ai is still in the air, anywhere within Verizon's 4G LTE coverage area — which spans more than 2.68 million square miles.

The Skyward Connected Drone Solution, available exclusively through Skyward, includes Parrot ANAFI Ai along with a one-year Skyward Business+ subscription and Verizon 4G LTE connectivity at no extra cost if pre-ordered by January 31, 2022. Skyward subscribers can fly Parrot ANAFI Ai and transfer data and imagery directly into Skyward over Verizon 4G LTE via Skyward's InFlight mobile app in order to create 2D maps and 3D models. A major feature of Parrot ANAFI Ai is its survey-grade accuracy.

Parrot ANAFI Ai integrated with Skyward and powered by Verizon 4G LTE retails for \$4,000, plus tax.

"The release of the first off-the-shelf drone with Verizon 4G LTE connectivity will advance drone operations

Providing strength & stability, with a twist.

for pilots nationwide,” said Mariah Scott, Executive Director of Robotics Business Technology at Verizon. “From supporting higher volumes of data transfer and yielding faster time to insight to enabling reliable beyond visual line of sight operations, we are proud to play a leading role in providing new capabilities. This is the next step in our ongoing efforts to connect the sky on America’s most reliable network for more than a decade.”

Announced in August as an exclusive offer for new and existing Skyward subscribers, the cellular-connected drone pairs Skyward’s Connected Drone Solution, a one-stop shop for planning, flying, data transfer and mapping and modeling, with Parrot ANAFI Ai, a compact professional drone built for work. Parrot ANAFI Ai sets a new communications standard with autonomous one-click flight plan creation and new levels of cybersecurity. The trailblazing combination features obstacle avoidance and streamlines complex missions for mapping and modeling in construction, infrastructure, inspection & surveying, and public safety.

As the first 4G LTE connectivity solution for aerial robotics in the U.S., the Skyward Connected Drone Solution also allows subscribers to process aerial imagery faster than has previously been possible with off-the-shelf drones. In addition to rapid imaging, customers get business-ready deliverables and quality results from drone data with Skyward Mapping & Modeling and have access to various airspace and fleet management tools.

Preorder Parrot ANAFI Ai 4G LTE connected to Verizon 4G LTE. •

The New Standard for Linemen

At Tallman Equipment, our priority is to set the standard in the electric transmission and distribution industry with an all-inclusive approach to serving our customers. Our vision to deliver a trio of quality, convenience, and reliability is driven by listening and adapting to the needs of our customers. As the industry changes, so does Tallman. As a result, Tallman Equipment has become a unique company within our industry offering a full range of professional services including tool sales, product distribution, rentals, and repair. Tallman is already a trusted name in stringing blocks, cable assemblies, fiberglass, and rope products – and we are excited to announce the addition of our new Rubber Goods Testing Lab.

Our Services Include:

Groundset & Jumperset Manufacturing, Repair & Refurbishing

Transformer Sling Manufacturing & Rope Repair

Battery Power Tool & Equipment Repair

Fiberglass Tool Testing, Repair & Refinishing

Tool & Equipment Rental

Quad Tracks Now Available for JLG® 600S and 660SJ Boom Lifts

Convert a normal, wheeled model into a highly capable, comfortable tracked machine

JLG Industries, Inc., an Oshkosh Corporation company [NYSE:OSK] and a leading global manufacturer of mobile elevating work platforms and telehandlers, now offers Quad Tracks for JLG® 600S and 660SJ boom lifts. Quad Tracks from JLG are made up of four triangular rubber-track systems, each measuring 34-in high by 54-in long by 18-in wide. They bolt directly to the boom lift's standard wheel hubs, offering increased machine utilization and flexibility for working on a range of surfaces, including sand, mud, gravel, grass, paved streets with curbs, potholes and sharp transitions.

The Quad Track's design is low-profile and developed to minimize impact on ride height, track width and maximum drive speed. These features provide the machine operator with the benefit of excellent floatation,

***Making perfect

SNAP!***

NEW **SNAP Connectors** from Greaves. A revolutionary compression connector concept that gets the job done with just a few turns of a standard wrench!

- ▶ Time-saving, easy installation
- ▶ Superior pull-out strength and conductivity
- ▶ No bulky and costly tools and dies

GREAVES

minimal rutting at job sites, improved traction, greater comfort over obstacles and no “break over” effect. And when the work is done, the Quad Tracks can be swapped out for regular tires or for use on other applicable models. An added bonus, the Quad Tracks do not require additional wide load transport accommodations for machine shipping when properly loaded and tied down for transport.

“There are many considerations when selecting a boom lift for the work at hand. This can sometimes make it challenging to choose between tires or tracks,” says Randi McClure, Marketing Manager for JLG Boom Lifts. “When this happens, Quad Tracks offer an alternative solution: The ability to convert a normal, wheeled JLG boom lift into a highly capable, tracked machine. This allows operators to cover a wide range of applications on multiple job sites with one machine — and offers fleet managers the ability to switch between continuous tracks and traditional wheels as needed.”

The new Quad Tracks from JLG are currently available with new 600S and 660SJ machine orders, as well as through aftermarket on select, 2-wheel steer models. Compatibility with additional models will be available in the near future. For more information, visit <https://www.jlg.com/en/equipment/options/boom-lift-options/quad-tracks>.

Power Tool Institute identifies easily employed best practices

Power tools and their batteries are rugged instruments designed to perform tough jobs, but they still require care to maintain safe, optimum performance. There are steps users can take to extend tool and battery life, and help keep power tools operating at peak performance for a longer life cycle.

THE FUTURE IS BRIGHT.

WITH A NEW MANUFACTURING FACILITY, ADDITIONAL
SERVICE CENTERS AND EXPANDED SERVICE AND PARTS TEAM

We're more prepared than ever to deliver.

For more than 75 years, Terex Utilities has been a pioneer of insulated and digging equipment for the electric utility industry. Along the way, we've established a pattern of innovation and continuous improvement in order to deliver solutions so linemen can be productive and keep the lights on for their customers. This is an exciting time in Terex Utilities' history – with strategic investments being made in our manufacturing capabilities, our service footprint, new products, team members and overall customer experience. The future is looking bright, and we're excited to continue delivering equipment and service solutions to the electric utility industry – now better than ever.

Give us a call at 844-TEREX-4U for your equipment, service and parts needs.

www.terex.com/utilities

TEREX®

WORKS FOR YOU.™

© 2021 Terex Corporation. Terex, the Terex Crown design and Works For You are trademarks of Terex Corporation or its subsidiaries. All rights reserved. January 2021.

The Power Tool Institute has compiled a list of best practices for safer use of batteries and power tools.

Safe handling

Start by reading the manufacturer's instruction manual – and only use original manufacturer's system components of tool, battery and charger. Do not impact or damage a battery (for example, do not use it as a hammer), use it solely for the defined purpose as specified by the manufacturer. If a battery has received a sharp blow, been dropped, or is damaged, discontinue use.

Regularly inspect batteries for signs of damage, such as crushing, cuts, or punctures. Be mindful of abnormal battery behavior, such as failure to fully charge or hold a charge, longer-than-usual charging times, noticeable drop in performance, liquid leakage from the battery, or melted plastic anywhere on the pack. These are indications of an internal problem.

Never modify, disassemble, or tamper with the battery because the performance can become unpredictable and dangerous. As a general practice, it is best to unplug battery chargers and remove battery packs from them when not in use.

Safe storage

Do not store batteries on their chargers. Always use and store the battery within the temperature limits stated by the manufacturer. Do not store in a closed location where sunlight may cause elevated temperatures, such as near a window or inside a vehicle. Do not store or transport the battery in a container with loose metal objects, such as coins, keys or nails, which may contact the terminals.

Safe response to overheating

Though batteries and chargers are safe to use when operated properly, in rare instances a battery may overheat. If the battery is exhibiting signs of overheating (flames, smoke, smoldering, or melting), immediate action is required. If connected to a charger when exhibiting signs of overheating, always unplug the charger first. After unplugging the battery charger, then pour copious amounts of water on the battery and then submerge the battery (including any attached tool or charger – do not directly touch/disconnect the battery) in a sturdy container filled with water. When transferring the battery, avoid direct contact with the battery (use a long-handled shovel) and use appropriate personal protective equipment to protect face, hands and body, since there is a risk that overheated batteries may vent, explode, or emit flame.

If the battery is exhibiting flames, continue using copious amounts of water until the flame is extinguished, then submerge the battery (including any attached tool or charger) in a sturdy container filled with water. If water is not available, dirt, sand or a conventional ABC extinguisher may be used in an attempt to smother and cool the battery until water is available.

Keep the battery submerged, in a well-ventilated location, for at least 24 hours and at least 15 feet away from any combustible items. Contact the manufacturer for guidance on proper disposal.

For more information about extending the life of power tools and their batteries, visit <https://www.powertoolinstitute.com/>.

Princeton Tec Introduces the Alloy-X for Industrial Task Lighting

Dual Fuel, Compact Penlight; Delivers 400 Lumens

Princeton Tec, a family-owned personal lighting manufacturer, has introduced an all new dual-fuel penlight, the Alloy-X. The light features a stunning 400 lumens and a 28-hour runtime all in one sleek, compact design. "The Alloy-X dual-fuel penlight is the perfect pocket carry light that is slim and packs a 400 lumen punch, allowing industrial workers and contractors quick and easy task illumination," says Princeton Tec Director of Industrial Sales, John Luchka.

Alloy-X's innovative dual-fuel technology allows the light to be powered via the included rechargeable

Unitrex XS™ Max Wear. Unmatched performance in the field and in the boardroom.

Electric line stringing is easier and more economical with Unitrex™. Made with a core of Honeywell Spectra®, it is up to 10 times lighter than steel, while delivering comparable strength. The urethane-coated polyester jacket provides excellent abrasion resistance for great productivity that lasts.

Performance. Passion. Possibilities.

lithium-ion battery, and to also function with two AAA alkaline batteries, so a low charge never stands between the user and getting the job done. Luchka says, "Since Alloy-X offers the convenience of both USB recharge-ability, and accepts two AAA batteries, this is the ideal work light for DIY or professional use."

Alloy-X is intuitively operated via a one-touch tail switch; a quick and simple click activates the light, as well cycles through high, medium, and low spot modes, allowing an effortless adaptation to the amount of light needed to complete the task at hand. The aluminum body of Alloy-X features textured knurling to ensure a firm and secure grip on the pen light, even while wearing gloves. The light is also

Rugged Dependability

STANDARD IN EVERY MACHINE WE BUILD!

Hogg & Davis has been proudly
manufacturing utility line equipment
for more than half a century.

Our trusted products are part
of the fleets and tool cribs of
nearly every investor-owned
power and communications
company in the United States
and Beyond.
