Overhead Remote
Cable Cutter for High
Voltage Work

Oshkosh
Corporation
to Acquire
Hinowa

INNOVATIONS

Faster Safer Workspace

iTOOLco.

ALL JACK™

Increase productivity and decrease fatigue using iTOOLco's All Jack™. Install pipe, lights, cabinets, drywall, temporary dust barriers and much more with this innovative jack designed to lift and support the weight of your workpiece while you anchor it into position.

High ceilings and ladder work are not a problem for this dynamic tool. Reach from 58" to a staggering height of 13'6". The industrial gas shock ensures a snug, stable support that stays in place while you complete the installation. Once your workpiece is secured into place, simply remove the All Jack™ by releasing the shock. More powerful than a typical support pole, the All Jack's gas shock can handle your most challenging jobs.

SCAN QR

CORDLESS CANNON 3K™

Speed, Versatility, and performance are all yours with iTOOLco's Cordless Cannon 3K™. This portable 3,000 lb. puller is intuitively designed to handle all of your day-to-day wire pulls.

The built-in capstan switch automatically turns the puller on and off. Simply tug on the rope to start the pull and slack off the rope to shut it down.

Delivers dynamic performance in remote locations or areas where power is not yet available.

The high-capacity rechargeable battery is long-lasting and delivers maximum power.

The Cannon 3K™ will even chew through a medium size run of 4 - 350 in 3" conduit with 4 - 90s 220' long in record time and still have half the battery life for your next pull.

Oshkosh Corporation to Acquire Hinowa

Builds on Successful 12-Year Partnership with JLG; Broadens Product Portfolio

Oshkosh Corporation, a leading innovator of mission-critical vehicles and essential equipment, today announced it has entered into a definitive agreement to acquire Hinowa® S.p.A., a privately held international company and leading manufacturer of track-based aerial work platforms, mini dumpers, lift trucks and undercarriages. Once complete, Hinowa will become part of the Oshkosh Access Equipment segment.

“We look forward to welcoming the Hinowa team into the Oshkosh family,” said John Pfeifer, Oshkosh Corporation’s president and chief executive officer. “This acquisition will accelerate our electrification capabilities and provide growth opportunities across core and adjacent markets.”

Hinowa is well-known for its advanced track designs and electrification expertise as an early adopter and leader in lithium-ion battery technology. Hinowa has produced JLG® compact crawler boom lifts since 2010, including electric, hybrid and diesel-powered models.

“We are excited to expand our long-term relationship with Hinowa,” said Frank Nerenhausen, executive vice president, Oshkosh Corporation and president, JLG Industries. “Combining our capabilities will enable us to better serve customers and expand our operational footprint in Europe.”

Hinowa was founded in 1987 in Nogara, Italy, and today has an approximate 250,000 sq. ft. manufacturing facility and 50,000 sq. ft. parts facility with nearly 230 team members. The company has a long history of innovation, offering a diverse line of premium products for work at height and vegetation management applications.

“We are pleased to join Oshkosh Corporation,” said Dante Fracca, founder and owner of Hinowa. “Our successful 12-year relationship with JLG, along with shared core values around culture, safety, productivity and sustainability position us well for the future.”

The Hinowa acquisition supports the Oshkosh accelerated growth strategy. The transaction, which is subject to customary closing conditions, is expected to close within 90 days. •

Company Profile • LANshack

Leave the terminating to us and expand your business opportunities. LANshack has been specializing in custom fiber optic and ethernet cabling for over 25+ years and makes fiber optic installations quick and easy with our pre-terminated fiber optic assemblies.

We offer full pre-terminated plug and play network solutions which include the fiber optic backbone or main assembly that typically takes place between buildings or other similar network extensions, the fiber optic enclosures, which house the connections or couplings, and patch cables to go into your equipment such as SFPs and network switches. We also offer custom ethernet patch cables, patch panels, keystone jacks, modular plugs, and all the tools needed to complete your installation. Not only do we offer full network solutions, but we also offer any jacket type, fiber type, and strand count. We can terminate assemblies from 1 strand through 288 strands and offer jacket types such as indoor, indoor/outdoor, OSP outside plant in non-armored and armored for direct burial use. For installers or an installation in which pre-terminated fiber doesn't work, we also offer bulk fiber, fiber optic pig tails, and fusions splicers.

LANshack has worked with all branches of the government and other critical network installations seen in aerospace, space, SATCOM, fiber to the antenna, and more. We are ISO9001 certified, and all of our custom fiber optic and Ethernet cables are made here in the USA with ultra-fast lead times. We keep you notified throughout the ordering process. When you place your order you will get confirmation, then a ship date within 24 hours, and an email with tracking once your order ships out. Over the years we've work with electrical contractors throughout the USA that have never installed fiber optic cabling before due to lack of knowledge or expertise of fiber optic cabling. We've guided them along the way and have helped countless contractors to expand their business. We also offer tiered discounted pricing for installers, resellers, government, and educational buyers. At LANshack we can help you get the cabling you need to bid the next fiber optic cable installation job that comes your way. If you can pull cable, then you can install a fiber optic network. We make IT that easy. They next time you come across a potential fiber optic installation, give us a call. We're here to help and want to help you expand your business!

Greenlee® Introduces Overhead Remote Cable Cutter for High Voltage Work

The new tool from Greenlee, a part of Emerson's professional tools portfolio, gives the user total operational control and provides easier access to hard-to-reach areas

Greenlee®, part of Emerson's professional tools portfolio, introduces the ES20LXR Overhead Remote Cable Cutter developed in conjunction with utility professionals to help "remove the target" in high voltage cutting applications.

Allowing unprecedented access to hard-to-reach overhead areas, the ES20LXR weighs less than 5 pounds with battery, has a 350-degree rotating head and is designed to give the user total operational control while cutting hard metals in utility distribution environments.

A universal remote with handheld and remote usage settings is compatible with all Greenlee remote tools. Visual indicators provide tool status with forward-stop-reverse at any point and the patented trigger jacket helps secure the tool with universal spline connection to the hot stick.

"The Greenlee ES20LXR Overhead Remote Cable Cutter is our latest tool solution designed to im-

prove the safety of high voltage workers,” said Ryan Berg, director of product management, Greenlee for Emerson. “This tool not only keeps users in the safe zone while cutting, its light-weight design and rotating head put less strain on the body to help reduce user fatigue.”

The 2.0Ah Makita® battery in the ES20LXR

charges in under 25 minutes, provides more cycles per charge and pairs with the Greenlee Link mobile app for performance tracking.

The ES20LXR is the latest tool in Greenlee’s complete line of remote cable cutters for the high voltage industry. Learn more by visiting Greenlee.com/RemoteCutter. Find a local

Loftness Announces Two-Year Warranty Program on Mulching Heads

Loftness has announced a two-year warranty program as a standard feature on its full line of Battle Ax, Bad Ax and Timber Ax mulching heads. Effective on products purchased on November 1, 2022, and later, the new program offers equipment protection up to twice as long as the previous warranty.

KUBOTA

16078022
battle
AX Skid-Steer

S
95

“As an employee-owned company, we’re fully committed to ensuring the quality of our products,” said Matt Morrison, Director of Sales and Marketing for Loftness. “Even though our mulching heads often work in harsh conditions, we’re confident enough to roll out an industry-leading two-year warranty program, which is double the standard warranty of most competitive units. This will add value to our customers and give them more peace of mind when purchasing our equipment.”

The two-year warranty is included with the Battle Ax L and S Series for skid steers; the 20, 30, 40 and 50 Series for excavators; and the H Series and Battle Ax Extreme for prime movers. It is also included with the Bad Ax and Timber Ax mulching attachments for skid steers.

Loftness will be making a formal announcement in booth 1819 at the TCI Expo, November 10-12, 2022, in Charlotte, North Carolina.

Loftness, an employee owned company, manufactures the VMLogix line of vegetation management equipment, which includes hydraulic oil coolers, the Kwik-Trim compact mechanical tree trimmer, and high-performance mulching heads for a variety of equipment, ranging from excavators, skid steer loaders and up to 375-horsepower prime movers. For more information on Loftness’ complete product line, contact Loftness Specialized Equipment, P.O. Box 337, Hector, MN 55342, call 800-828-7624 (U.S. and Canada) or 320-848-6266 (international), email info@loftness.com, or visit www.loftness.com •

Founded by a team of industry veterans focused exclusively on the transformer and transformer-related needs of industrial and commercial clients.

Sell

Maddox stocks and sells the highest quality transformers from dry types and padmounts to substations.

Rent

With thousands of units in stock, Maddox rents out transformers for the temporary power needs of customers across North America.

Repair

With shops on both coasts Maddox inspects, tests, and repairs transformers to ensure that they are in top working condition.

Purchase

We offer a great price that includes handling all the transportation and environmental issue.
