DICA Expands Ground Protection Product Line with SlatTrax Acquisition

DICA announces the acquisition of SlatTrax, the next generation of ground protection and temporary access road for a variety of markets, including general construction, utilities, public works departments, grounds care, and hardscape contractors, to name a few. SlatTrax is an engineered ground protection solution that can be deployed mechanically or manually. Both options allow users to deploy and retrieve the roadway quickly.

“This acquisition is a natural expansion of the DICA brand. SlatTrax provides temporary worksite access, minimizes damage to lawns, and gives crews a stable work surface. Durable and easy to handle, SlatTrax is a unique solution for companies that are working with light and medium duty equipment in a wide variety of industries,” said Kris Koberg, CEO of DICA.

DICA acquired SlatTrax from Gary Ringus who was the founder and owner of the company. “I appreciate this opportunity to further develop SlatTrax products with a company that is aligned with my vision to create efficient and ergonomic ground protection solutions. Our common goal is to improve day-to-day operations for construction and maintenance crews,” said Ringus. DICA has assumed all ongoing operations for the

SlatTrax brand, and Ringus remains involved, working as a consultant and a manufacturer's representative during the transition.

"SlatTrax is not a mat—it's a temporary roadway made up of 12.5 ft. and 25 ft. sections. The sectional design makes the construction of the temporary roads highly efficient because the slats can be separated without the use of tools or easily combined to create longer roads," said Kevin Koberg, Director of Marketing at DICA. The roadway can be deployed from a spool attachment on a skid steer or manually moved into place by one or two people using built-in straps. SlatTrax is made of ¾-inch recycled plastic slats which are connected with spine and capture joints that enables articulation (rolling) and arcing (curving) of the roadway.

Earlier this year, DICA moved to a new facility which doubled the company's manufacturing capabilities. "Our new facility enables us to increase SlatTrax product availability and shorten lead times. We are building inventory, and soon, all standard products will be available to ship from stock," said Kris Koberg.

About DICA

DICA, Urbandale, Iowa, has been specializing in building a better outrigger pad since 1988. By creating engineered solutions for improving equipment stability and ergonomic safety, DICA is leading the way in product innovation for outrigger pads, crane pads and cribbing.

DICA outrigger pads and crane pads are used in 50+ countries and on all 7 continents around the world in construction, maintenance, electrical utility, oil and gas and tree care as well as local, state and federal government agencies. Learn more at www.dicausa.com

Huskie Tools Introduces the Next Evolution of Battery Powered Cutting & Compression Lineman Tools – the SLC Series

Chicago Based Tool Innovator Creates Advanced Lineman Tools on popular Milwaukee® and Makita® Battery Platforms

Huskie Tools, LLC, located just outside of Chicago, Illinois has built their over 45-year reputation for designing and manufacturing the highest quality and safest battery-powered, hydraulic utility linemen tools in the industry. Huskie Tools offers a new streamlined SLC battery powered lineup, the next evolution in precision cutting and crimping tools.

SLC BY HUSKIE TOOLS – AN EVOLUTION IN BATTERY POWERED HYDRAULIC CUTTING & COMPRESSION TOOLS FOR UTILITY LINEMAN

“At Huskie Tools, it’s our mission to build and deliver the industry’s most innovative tools that exceed the demands of linemen. We know they work in tough conditions – overhead through storms and underground in the dark. We took those difficulties into account when developing the new SLC line. Compact and ergonomic with an industry-only selectable 360° LED light ring, the new compact SLC tools will weather the storms with maximum reliability, durability and safety,” stated Nicholas Skrobot, CEO, Huskie Tools.

YOUR JOB IS TOUGH — YOUR TOOL CHOICE IS EASY

Huskie Tools focus for over 45 years has been developing and building the best-performing, most durable, dependable, and safest line of cutting and compression tools for linemen in the utility industry. “We have the experience, knowledge and resources to engineer the best and safest hydraulic tools in the industry. I’m proud to be part of such a talented product team launching the SLC line. This line has incredible new features such as the 18V brushless motor to provide longer life, electronic switch for maximum reliability and durability and ease of use, and an industry first, our 360° LED light ring for working in dark areas and EVS jaws with improved performance and longer life. This is what linemen need, and this is reason we are the #1 choice of experienced linemen,” explained Dan Voss, Product Development Director and 30-year Huskie Tools veteran.

FIRST TO INTRODUCE BATTERY-POWERED TOOLS

Huskie Tools introduced the industry’s first line of battery-powered hydraulic cutting and compression tools in 1989, and today offer over 190 battery-powered tools on three leading battery platforms: Makita®,

INNOVATIONS

Faster Safer Workspace

iTOOLco.

ALL JACK™

Increase productivity and decrease fatigue using iTOOLco's All Jack™. Install pipe, lights, cabinets, drywall, temporary dust barriers and much more with this innovative jack designed to lift and support the weight of your workpiece while you anchor it into position.

High ceilings and ladder work are not a problem for this dynamic tool. Reach from 58" to a staggering height of 13'6". The industrial gas shock ensures a snug, stable support that stays in place while you complete the installation. Once your workpiece is secured into place, simply remove the All Jack™ by releasing the shock. More powerful than a typical support pole, the All Jack's gas shock can handle your most challenging jobs.

SCAN QR

CORDLESS CANNON 3K™

Speed, Versatility, and performance are all yours with iTOOLco's Cordless Cannon 3K™. This portable 3,000 lb. puller is intuitively designed to handle all of your day-to-day wire pulls.

The built-in capstan switch automatically turns the puller on and off. Simply tug on the rope to start the pull and slack off the rope to shut it down.

Delivers dynamic performance in remote locations or areas where power is not yet available.

The high-capacity rechargeable battery is long-lasting and delivers maximum power. The Cannon 3K™ will even chew through a medium size run of 4 - 3/5 in 3" conduit with 4 - 90s 220' long in record time and still have half the battery life for your next pull.

FOLLOW US:

Huskie Tools®, and Milwaukee®. We also have a full line of manual tools, presses, dies, and pole pullers -- no one in the industry has a deeper, wider utility industry product solution offering than Huskie Tools. We know what it's like to use our tools in a driving rainstorm with thousands of families depending on you to restore their power. Or to have to twist and contort your body just to access an underground area that needs repair. That's why we continue to offer battery-operated hydraulic tools, such as SLC, that are among the fastest, and most ergonomically designed and balanced on the market today," stated Charlie Kelly, VP, Sales.

ABOUT HUSKIE TOOLS, LLC

Born in Chicago over 45 years ago, Huskie Tools is a full-service company and proven leader in providing utility industry linemen a complete range of product solutions including battery-powered cutting and compression tools, presses, pumps, dies, manual tools and the TiiGER pole puller for all distribution, substation, transmission, over-head and underground utility projects.

Visit Montabert® at CONEXPO-CON/AGG

Learn about New Developments in Tools for Breaking, Demolition, and Recycling

Visitors are encouraged to visit Montabert® in the West Hall, booth #W42229, during CONEXPO-CON/AGG, March 14 to 18, 2023, in Las Vegas to learn about new developments in rock breaking and demolition tools. New products to be highlighted at the show include the SD Compact Breaker for rock breaking. The SD line is designed to fit compact carriers such as mini-excavators and skid steers. Additionally, Montabert's new line of Silent Demolition Tools, including grapples, processors, fixed and rotating pulverizers, and scrap shears, offer contractors multiple options for demolition and recycling applications.

Montabert's SD series of hydraulic breakers is designed for use on skid-steer loaders, backhoe loaders, and mini-excavators, providing versatility and productivity to accomplish multiple tasks with a single carrier, a single operator, and a single attachment. With fewer wear parts and no tie rods, the SD offers quick and easy maintenance in the field or the shop. Bushings, pins, and tools can easily be replaced in the field without removing the breaker from the carrier. The fully enclosed, soundproof cradle reduces vibrations transferred to the carrier, as it limits noise on the jobsite. Lightweight, yet heavy-duty housing protects working parts and hoses. A unique energy chamber acts as hydraulic shock absorber and reduces pressure variations in the hydraulic circuits to provide consistent energy to the breaker. The SD line includes seven models for compact carriers from 1 ton to 12 tons.

The Montabert® Silent Demolition Tools line offers a wide range of quality tools designed and built to provide contractors with an excellent price-performance ratio and low maintenance cost. The combination of ultra-wear-resistant steels and top-quality components makes Montabert Silent Demolition Tools versatile, efficient, and durable. Grapples are designed for carriers from 5 tons up to 100 tons. They feature 360° rotation, Hardox® 400-450 jaws and Hardox 500 exchangeable blades. Multiprocessor jaws for carriers weighing 8 to 65 tons include combi-, multifunction and scrap-metal jaws. They offer 360° rotation, speed valve cylinders, and exchangeable Hardox 600 crushing teeth. In the Pulverizer line, Montabert offers both

ALL Adds 11 New Liebherr ATs

135- to 900-ton all terrain cranes included in package

The ALL Family of Companies, the largest privately-owned crane rental and sales enterprise in North America, has purchased a package of 11 new all terrain (AT) cranes from Liebherr, ranging in capacities from 135 tons to 900 tons. The majority of the new cranes will be delivered by June 2023.

Chad Rados, project coordinator for ALL, says the package speaks to the continued popularity of ATs among a wide range of customers. “Our whole class of Liebherr ATs is always working,” said Rados. “From new construction to bridges to refinery and mill work, they’re in demand. This package will update our fleet as well as replace some older stock.” Rados estimates each crane will be out on job sites within a week of delivery, after the maintenance team completes its detailed commission process.

As ATs have gotten longer and stronger, general contractors have found more uses for them. “There are many lifts, especially in tight confines, where these larger ATs can do work that was formerly exclusive to crawler cranes, and do it with faster prep work and set-up times and fewer days on rent,” said Rados.

Rados is particularly excited about the acquisition of 360-USt Liebherr LTM 1300-6.3, the first-ever in the ALL fleet, with an impressive 295-foot boom. “With the long boom, it can achieve maximum reaches without adding any extensions or luffing jibs,” said Rados. “It will do well in the industrial market, especially in tighter areas, as well as urban jobs where we don’t have a lot of room with street closures and obstructions.”

Rados praises the versatility of Liebherr ATs. “They have similar set-up times no matter the capacity, so customers can rent something larger without adding time and cost to the build. We often sub-in a 500-ton AT for a 300-ton lift. The 1300 gives us another option.”

We will help you **Find the Way.**

• 970/292-8207 • www.edeinst.com •

The package of new cranes includes four Liebherr LTM 1450-8.1, two Liebherr LTM 1120-4.1, and one each Liebherr LTM 1160-5.2, Liebherr LTM 1250-5.1, Liebherr LTM 1300-6.3, Liebherr LTM 1650-8.1, and Liebherr LTM 1750-9.1.

The 900-USt LTM 1750 would be the third added to the fleet in three years.

"Liebherr has been an excellent partner," said Rados. "We're pleased to add these machines to the fleet and get them to work for our customers."

About ALL

The ALL Family of Companies is the largest privately held crane rental and sales operation in North America. Their strategically located branches have access to one of the world's largest and most modern fleets, operating under the ALL, ALT, Central, Dawes and Jeffers names. CON/AGG 2023

Learn About the Company's Newest Innovative Attachments for Producers and Contractors

Mazio will have its experts on hand in the West Hall, at booth # W43211, during CONEXPO-CON/AGG, March 14-18, 2023, in Las Vegas. Visitors will learn how Mazio's innovative attachments will help them save time and money in the quarry and on the jobsite. Mazio's newest innovation for 2023 is the Tilt-Rotator for excavators. Tilt-Rotators have seen great interest in Europe, and they are growing in popularity within the US. These supplemental attachments work with excavator tools, such as grapples, buckets, or shears, to provide more versatility and precision. They not only rotate 360°, but they also tilt side-to-side by up to 55°. This ability reduces the need for the operator to move the excavator while performing tasks — increasing productivity and efficiency. The Mazio Tilt-Rotator features a hydraulic quick coupler that allows the operator to remain in the cab while changing tools. It enjoys maintenance-free operation, with no grease points and no cylinders. It allows access to narrow spaces and on urban projects with large or small equipment. In addition to the Tilt-Rotator, the Mazio booth will

Rotary Announces New Line of Fully Automatic Air Conditioning Recharging Machines Powered by TEXA™

Rotary, part of Vehicle Service GroupSM (VSG), a Dover company, is excited to announce the launch of its groundbreaking new line of fully automatic air conditioning diagnostic and recharging equipment through Rotary's recently announced partnership with TEXA.

Unveiled for the first time at the recent 2022 SEMA Show, the new Rotary product line provides North American automotive service professionals with a quick, efficient and cost-effective way to recover, recycle and recharge R134a and R1234yf refrigerant gases.

There are three models launching in spring of 2023:

- The single-gas R3AC50-A (R134a refrigerant compatible)
- The single-gas R3AC60-YF (R1234yf refrigerant compatible)
- The industry-leading dual-gas R3AC80-AYF (both R134a and R1234yf compatible) that automatically purges between gas changes

“These A/C machines, coupled with Rotary’s unparalleled service and support network, are an absolute game-changer,” said Ian Wendler, Vice President & General Manager for VSG Americas. “We look forward to hitting the market this spring with a product that will increase the amount of work shops can perform – and revenue that can be obtained – as we head into the busy A/C season.”

“Based on the high level of excitement and interest that was generated during their debut and demonstration at this year’s SEMA show, it’s clear we have something that automotive service professionals will want to get their hands on sooner rather than later,” Wendler added.

Focused on productivity with super-fast process times, vehicle data updates and superior up-time, the Rotary A/C machines make it possible for service centers to charge more vehicles per year. Each machine can update automatically, receive remote assistance and connect to other devices, such as printers and smartphones. The new product line is also backed by Rotary’s vast service network and industry-leading warranty.

Rotary is currently accepting preorders for Spring 2023 delivery. For more information on how Rotary A/C repair solutions can put more money in your pocket, visit www.rotarylift.com/ACCart •

Maddox is the one-stop shop for your transformer needs

Founded by a team of industry veterans focused exclusively on the transformer and transformer-related needs of industrial and commercial clients.

Sell

Maddox stocks and sells the highest quality transformers from dry types and padmounts to substations.

Rent

With thousands of units in stock, Maddox rents out transformers for the temporary power needs of customers across North America.

Repair

With shops on both coasts Maddox inspects, tests, and repairs transformers to ensure that they are in top working condition.

Purchase

We offer a great price that includes handling all the transportation and environmental issue.
